

ECOTURF LOW MAINTENANCE LAWN MIX

- Low maintenance
- Environmentally friendly
- Endophyte enhanced

APPLICATION RATE
1.5-2 kg/100m², 3-4 lbs/1,000ft²

GERMINATION
7-21 days

DESCRIPTION
ECOTURF provides a low maintenance lawn that is environmentally friendly. Once established, this lawn requires less mowing, fertilizer, and water. ECOTURF is comprised of varieties that contain high levels of endophyte which is linked to reduced leaf growth, natural insect and disease resistance, better wear tolerance, and increased winter persistence.

ECOTURF provides a fast germinating, quick establishing stand. Ideal for use in dry sandy soil conditions, lawns without irrigation and areas where minimal maintenance and inputs are required. Can be used in full sun or shade.

MIX COMPONENTS

| | |
|------------|---------------------------|
| 40% | Creeping Red Fescue |
| 20% | Certified Chewings Fescue |
| 15% | Certified Hard Fescue |
