

September 2015

Festulolium is the name for a hybrid forage grass developed by crossing Meadow Fescue (*Festuca pratense*) or Tall Fescue (*Festuca arundinacea*) with perennial ryegrass (*Lolium perenne*) or Italian ryegrass (*Lolium multiflorum*). This enables combining the best properties of the two types of grass.

The following DLF article provides more information on Festuloliums
<http://ipaper.ipapercms.dk/DLF/DLFINTERNATIONALSEEDS/Forage/Festulolium2013/>
