

## AGGRESSOR TOURNAMENT

### **General Description**

Aggressor Tournament is a combination of three of the most recently commercially released bentgrass varieties in the golf industry; MacKenzie, Sandhill and Brighton. This Certified blend has a wide range of climatic adaptability, due to the genetic diversity of the blend.

### **Usage**

Mackenzie, Sandhill and Brighton are very compatible in a blend. All varieties are vigorous, fine textured, produce high shoot densities and have a dark green color. Furthermore, they all have a very upright growth habit. This results in a putting surface that is easier to maintain and keep in ideal conditions without the segregation and high intensity maintenance of other varieties.

### **Adaptation**

- Excellent choice for greens, tees and fairways.
- Minimal segregation due to similar growth habits
- Well adaptable to withstand various climates and conditions, heat, humidity & cold weather persistence
- Excellent disease resistance including Pythium, Brown Patch & Dollar Spot
- Dark green, uniform growth habit
- More environmentally friendly, reduces chemical input

### **Mixture**

Mackenzie, Sandhill and Brighton Creeping Bentgrass

### **Limitations**

Not adapted to dry or non-irrigated areas.

### **Seed Rate**

New turf: 1 to 1.5 pounds per 1,000 sq.ft. or 45 to 65 pounds per acre  
(5 to 7.5 grams per square meter or 50 to 75 kilograms per hectare)

Overseeding/Interseeding:

2 to 3 pounds per 1000 sq.ft. or 90 to 135 pounds per acre  
(10 to 15 grams per square meter or 100 to 150 kilograms per hectare)
