

ENVIROGREEN 1000

General Description

ENVIROGREEN 1000 is a specially formulated seed mixture designed for 'overseeding' an existing lawn or establishing a 'new' lawn. The blend is designed to meet the strict Environmental management/IPM requirements required in most local municipalities today.

Usage

ENVIROGREEN 1000 is primarily for a more natural, low maintenance turf especially where chemical restrictions are in place. Whether managing a sports field, park, home lawn, commercial property or golf course, ENVIROGREEN 1000 will provide a fast germinating, quick establishing, high density, low maintenance quality grass stand. The blend also utilizes a higher percentage of perennial ryegrass to provide a natural solution to weed control and prevention.

Adaptation

- Endyophyte enhanced for natural and safe insect resistance
- Good wear tolerance
- Good shade & drought tolerance
- Low growth & good density
- Good heat tolerance
- New winter hardy varieties

Mixture

- 40% Jasper II Creeping Red Fescue
- 20% Spartan Hard Fescue
- 20% Alpine/Quantum Leap Kentucky Bluegrass
- 20% Quebec Perennial Ryegrass

Limitations

ENVIROGREEN 1000 has a low shoot growth rate and should not be used where an aggressive, fast growing seed mixture is more appropriate.

Seed Rate

New lawn: 4-5lbs/1000ft² (2-2.5kg/100m²)

Overseeding: 6-8lbs/1000ft² (3.25-3.75kg/100m²)

**Seed rates may vary based on application*
