

ENVIROGREEN 2000

General Description

ENVIROGREEN 2000 - is a specially formulated seed mixture designed for 'overseeding' an existing lawn or establishing a 'new' lawn. The blend is designed to meet the strict Environmental management/IPM requirements required in most local municipalities today.

Usage

Whether managing a sports field, park, home lawn, commercial property or golf course, ENVIROGREEN 2000 will provide a fast germinating, quick establishing, high density, low maintenance quality grass stand. The blend also utilizes a higher percentage of perennial ryegrass to provide a natural solution for weed competition.

Adaptation

- Excellent salt & shade tolerance
- Excellent drought tolerance
- New winter tolerant varieties
- Insect resistant
- Fast establishment
- Excellent weed control
- Low growth & good density
- Good heat tolerance

Mixture

20% Sealink Creeping Red Fescue

20% Victory II/Windward Chewings Fescue

25% Quebec/Fiesta III Perennial Ryegrass

25% Transist 2200 Intermediate Ryegrass

10% Quantum Leap Kentucky Bluegrass

*Mixture percentages and varieties may change at anytime.

Limitations

Do not seed at less than recommended seeding rate to ensure adequate turf development and coverage.

Seed Rate

New Lawn: 5-6lbs/1000ft² (2.5kg-3.25kg/100m²)

Overseeding: 7-10lbs/1000ft² (3.5/5kg/100m²)

**Seed rates may vary based on application.*

**For maximum weed prevention and competition a 50% higher seeding rate is recommended. This helps the establishment rate and initial density, providing greater weed control.*
