

WestStar Alfalfa

What is it?

The **only** choice for producers who insist on the highest quality alfalfas, but require greater adaptability.

Why grow it?

Features	Benefits
1/3 creeping rooted, 1/3 multifoliolate type, 1/3 standard taproot type	➤ Provides superior adaptability to varying soil conditions
Multifoliolate expression	➤ Improved digestibility
Very good regrowth	➤ Multi-cut hay system; extra grazing
Persistence	➤ Maintains high yields as stand matures
Excellent winter hardiness	➤ Suited to the harsh conditions of Western Canada
Excellent disease resistance	➤ Increased stand longevity

How to grow it...

Seeding Information	Adaptations	Management
10-12 lbs/ac of inoculated seed	Well drained soils preferred	Recommended not to graze below 10-15 cm
Seed ¼ to ½ inch deep	Tolerance to saline and alkaline soils	If cut for hay, cut at 10% bloom
Seed bed should be firm; packing may be required	Excellent winter hardiness	Fertilize according to soil tests; phosphate, potash and sulfur required
