

Able Alfalfa

What is it?

Excellent disease resistance, improved regrowth and greater adaptability at an unbelievable price!

Why grow it?

Features		Benefits
10-20% creeping root expression	➔	Provided superior adaptability to varying soil conditions; suited to less than ideal conditions
Very good regrowth	➔	Multi-cut hay system; extra grazing
Persistence	➔	Maintains high yields as stand matures
Excellent winter hardiness	➔	Suited to the harsh conditions of Western Canada
Excellent disease resistance	➔	Increased stand longevity

How to grow it...

Seeding Information	Adaptations	Management
10-12 lbs/ac of inoculated seed	Well drained soils preferred	Recommended not to graze below 10-15 cm
Seed ¼ to ½ inch deep	Tolerance to saline and alkaline soils	If cut for hay, cut at 10% bloom
Seed bed should be firm; packing may be required	Excellent winter hardiness	Fertilize according to soil tests; phosphate, potash and sulfur required
