

Timothy

Comer

Timothy (Phleum Pratense)

- Very leafy – improved feed quality for better gains
- Medium maturity – earlier than Erecta but later than Timpro
- Significantly taller plant type in the spring

Richmond

Timothy (Phleum Pratense)

- Extra leafy – improved feed quality for better gains
- High yielding variety that out-yields other varieties in a two-cut system
- Excellent re-growth characteristics – great for two-cut hay or fall grazing
- Excellent winter-hardiness
- Early maturity
- Ideal for use with multi-cut alfalfa varieties
